

Visualization Report for Internship OIBSIP - Third Project

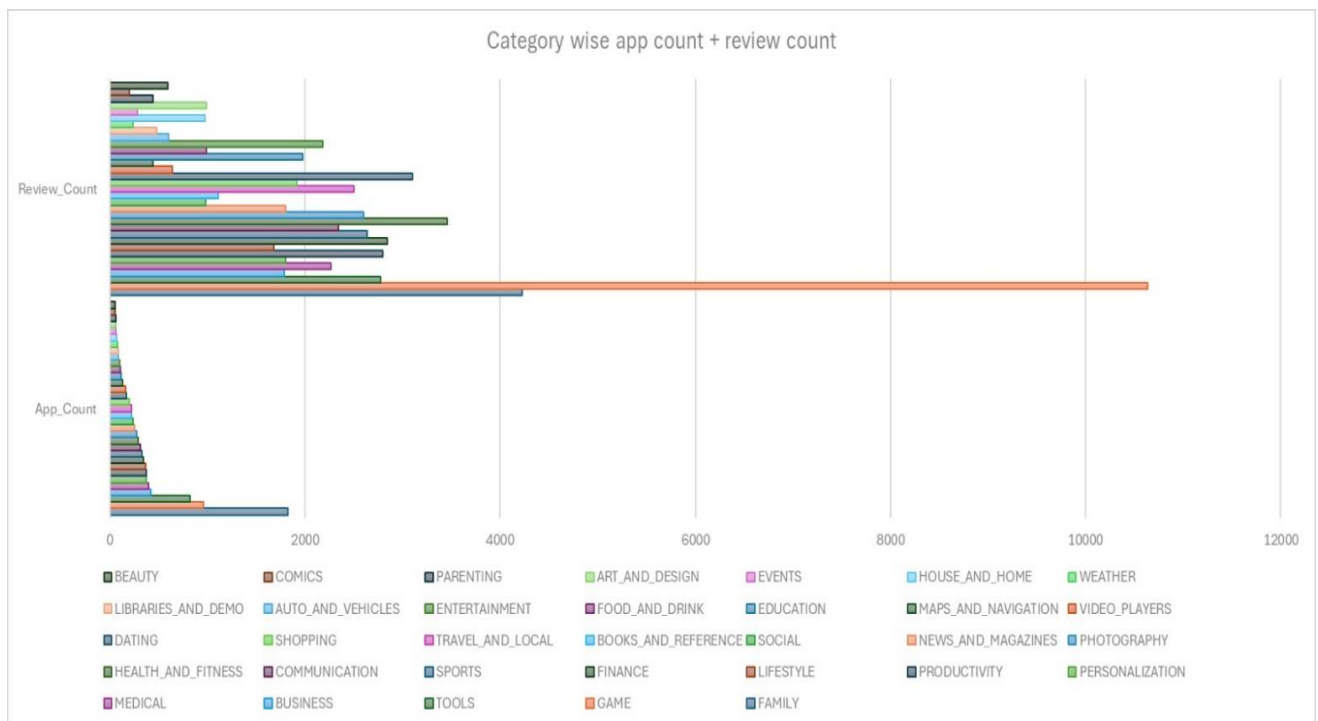

Purpose:

To present cleaned relational dataset insights through visualizations.

Each section contains chart headings and short insights. Insert chart images under each heading.

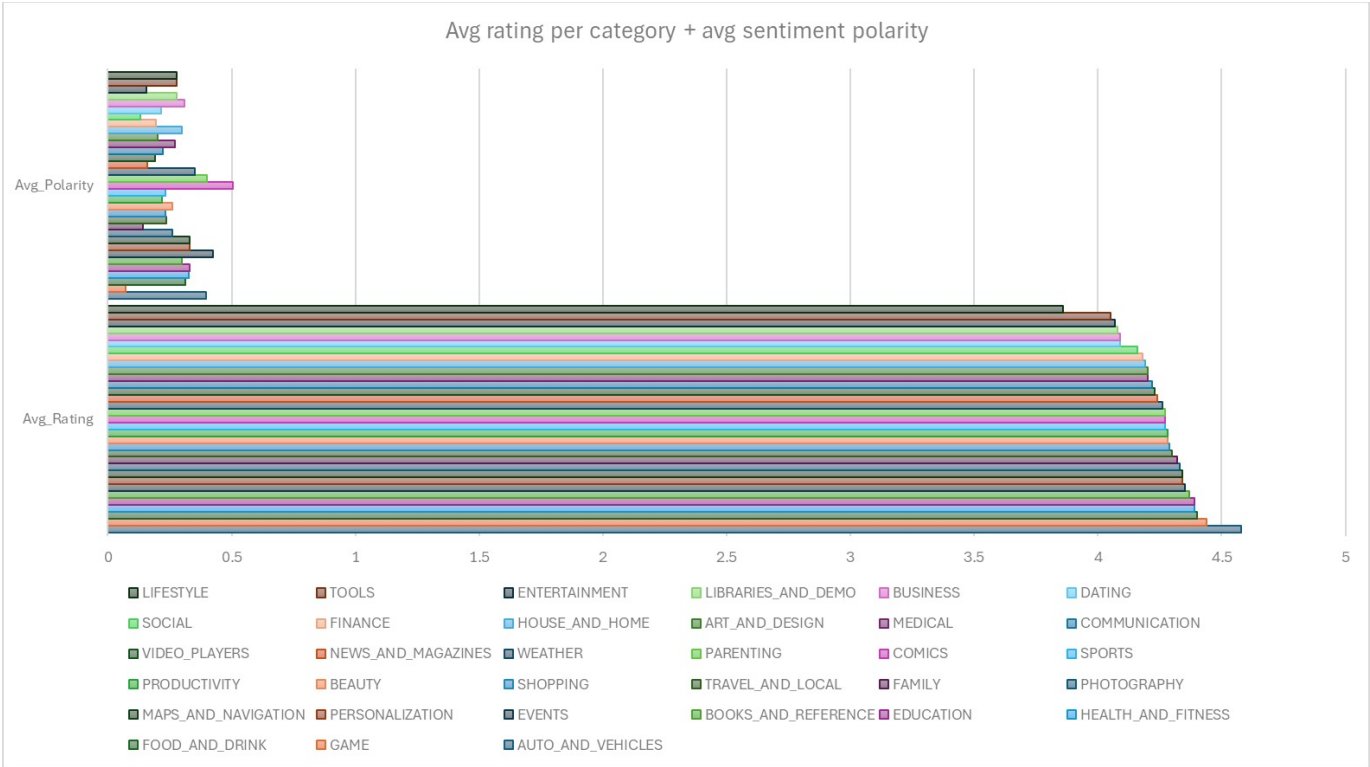

Section 1: Category Exploration

Chart 1: Category wise App Count + Review Count (Bar Chart)

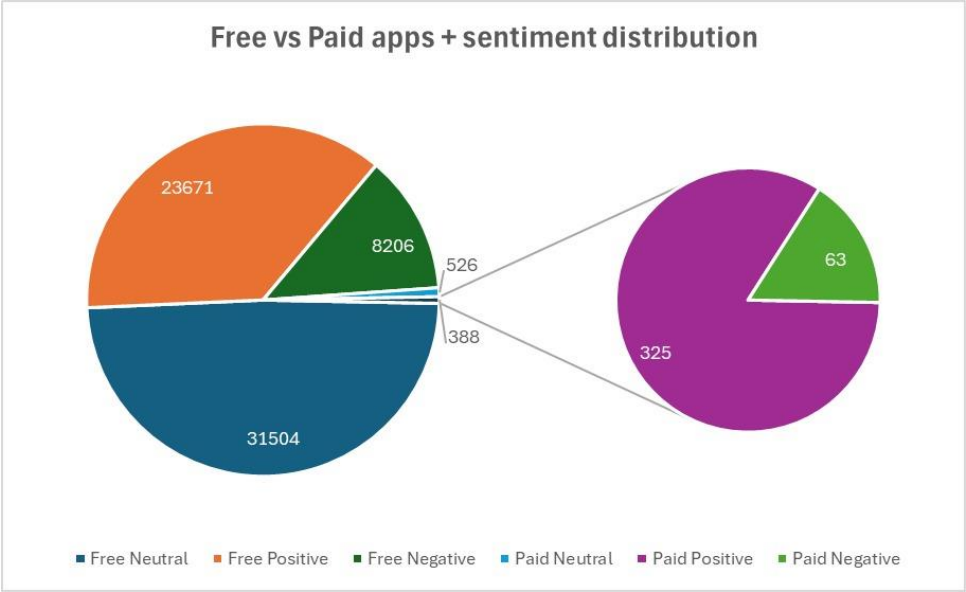

Insight: Shows which categories dominate app distribution and engagement.

Chart 2: Avg Rating per Category + Avg Sentiment Polarity (Bar Chart)

Insight: Highlights whether highly rated categories also have positive sentiment.

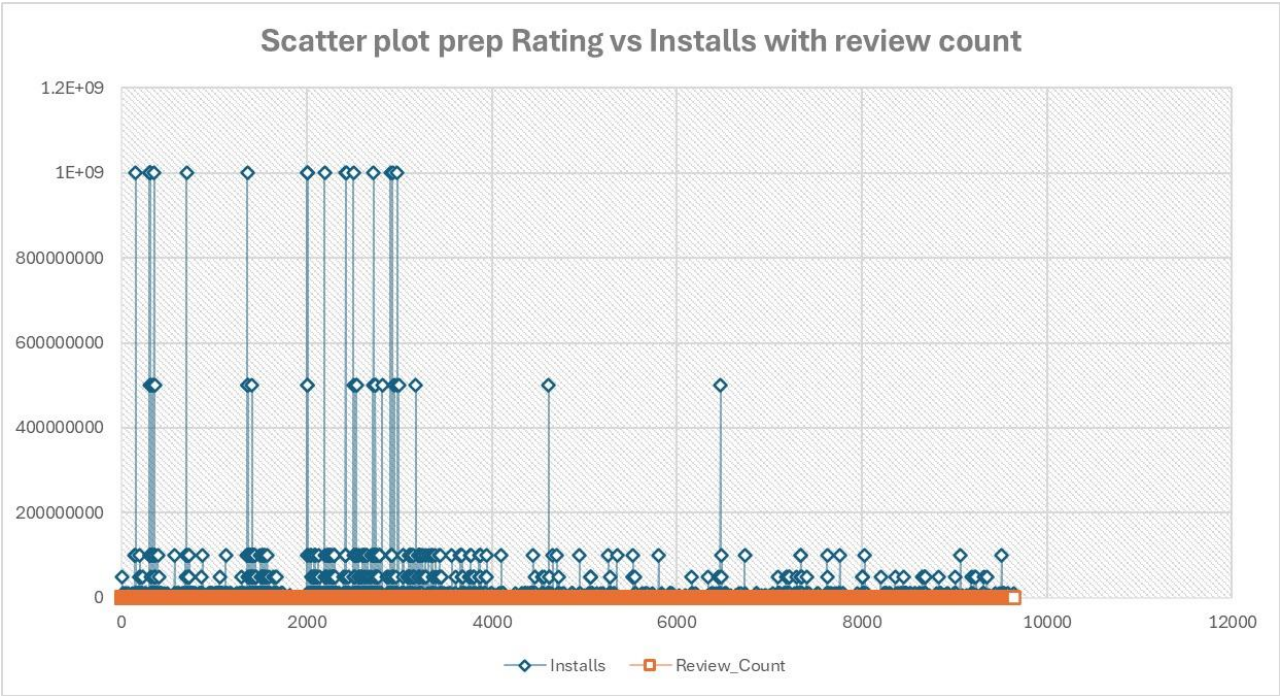

Chart 3: Free vs Paid Apps Sentiment Distribution (Pie Chart)

Insight: Compares monetization type with user satisfaction levels.

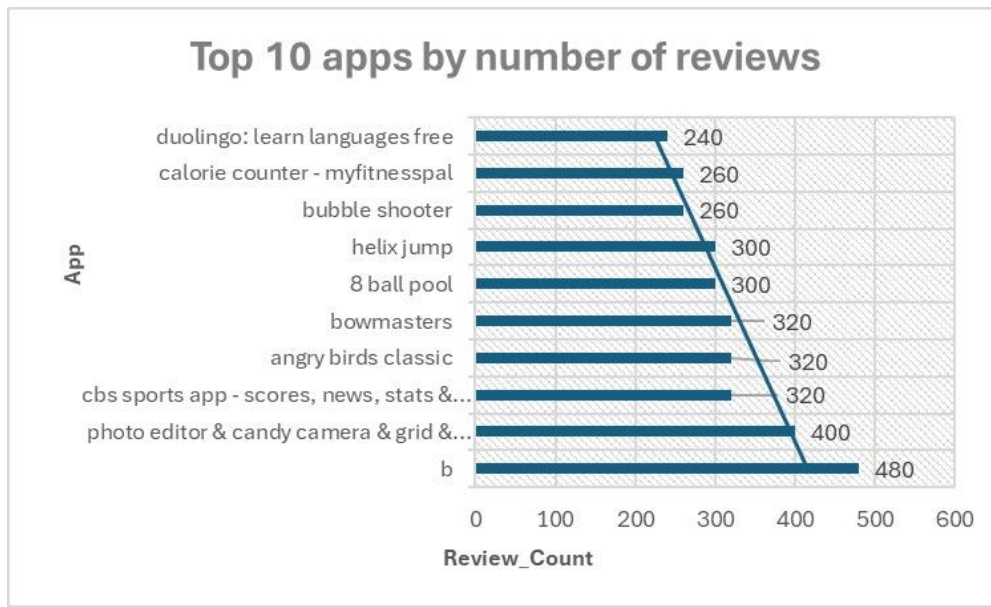

Section 2: Metrics Analysis

Chart 1: Rating vs Installs (Scatter Plot)

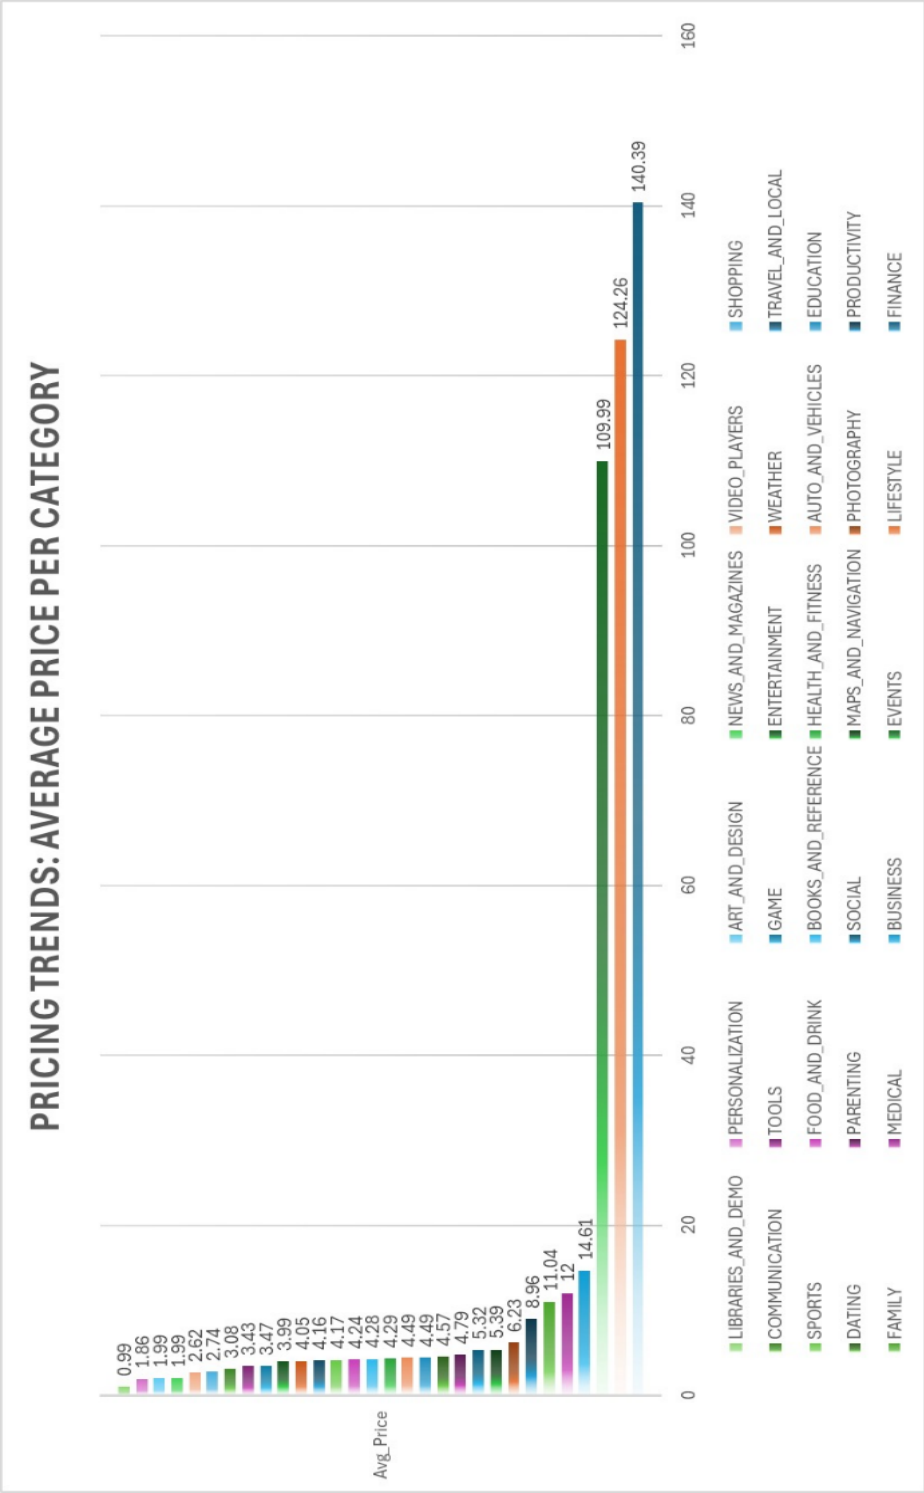

Insight: Shows popularity trend and engagement correlation.

Chart 2: Top 10 Apps by Reviews (Bar Chart)

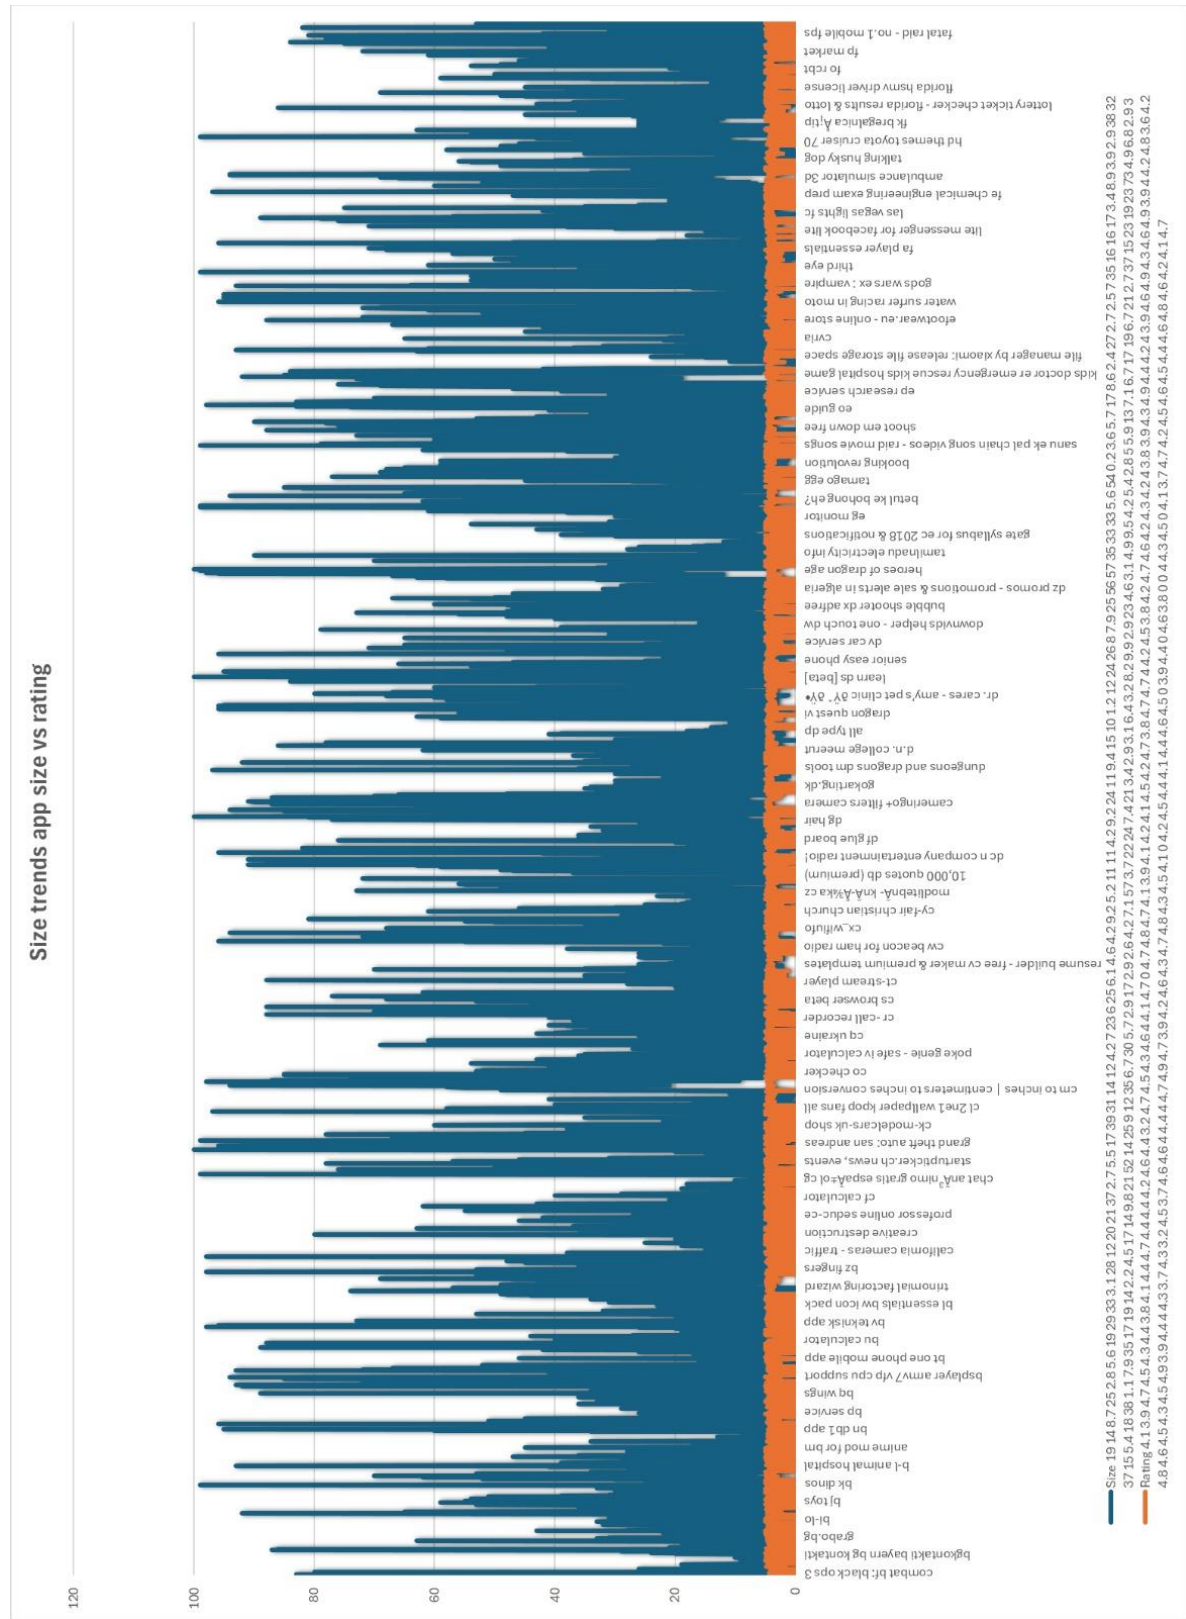

Insight: Highlights the most discussed apps.

Chart 3: Avg Price per Category (Bar Chart)

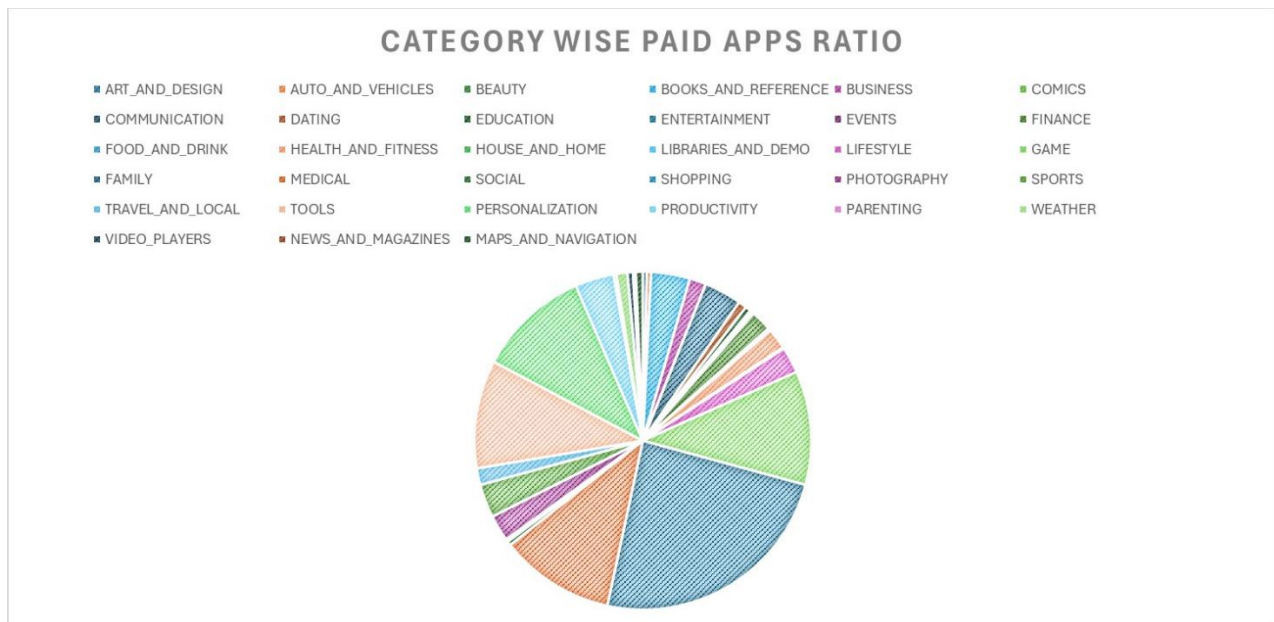

Insight: Shows pricing trends across categories.\

Chart 4: Size vs Rating (Line Chart)

Insight: Explores whether larger apps get better ratings.

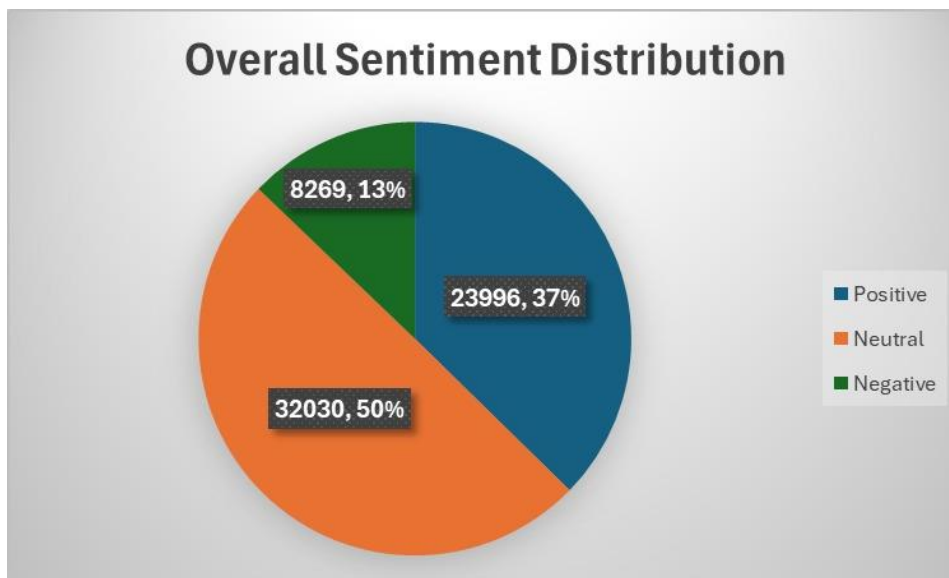

Chart 5: Category wise Paid Apps Ratio (Pie Chart)

Insight: Shows monetization strategy across categories.

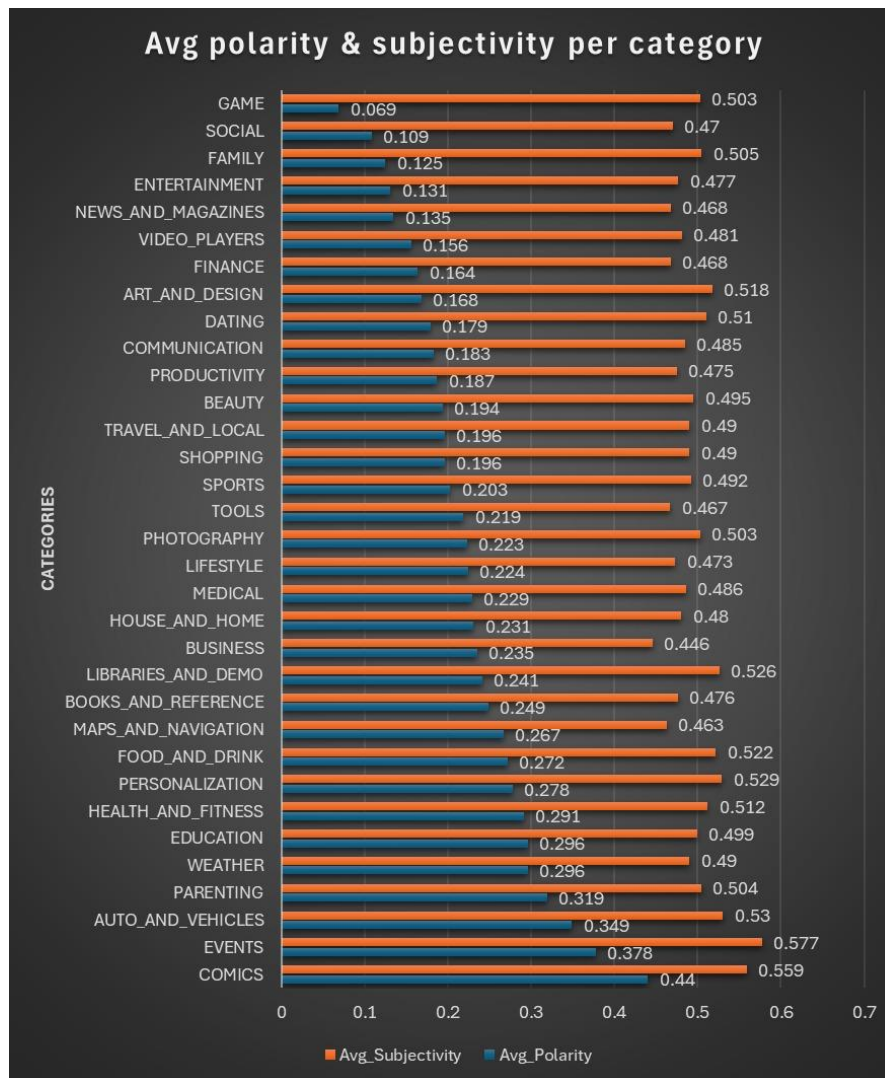

Section 3: Sentiment Analysis

Chart 1: Overall Sentiment Distribution (Pie Chart)

Insight: Shows Positive vs Neutral vs Negative share across all reviews.

Chart 2: Avg Polarity & Subjectivity per Category (Bar Chart)

Insight: Highlights positivity and opinion-heaviness by category.

Chart 3: Reviews vs Installs Correlation (Heatmap)

The heatmap has been exported as PDF and is available in the Visualization folder on the main branch for reference.

Insight: Shows if popular apps (high installs) attract more reviews and positivity.
